POONDRU ATHARV REDDY

Hyderabad, Telangana, India | +91 9573546197 | atharvareddy.04@gmail.com
Portfolio | GitHub | LinkedIn

PROFILE

- Aspiring Cybersecurity professional with hands-on proficiency in Vulnerability Assessment & Penetration Testing (VAPT), SOC operations (L1/L2), and web application security auditing.
- Skilled in evaluating attack surfaces, validating standard OWASP Top 10 vulnerabilities, and conducting live network packet inspection using Burp Suite, OpenVAS, Nmap, and Wireshark.
- Experienced in engineering reproducible Proof-of-Concept (PoC) exploits and compiling technical remediation and vulnerability severity reports.

TECHNICAL SKILLS

- **Core Focus & Security Operations:** SOC Operations (L1/L2), Incident Monitoring, Web App Security, OWASP Top 10, VAPT, Threat Analysis, PoC Development, Attack Surface Auditing.
- **Security Tools & Frameworks:** Burp Suite (Repeater, Intruder), OpenVAS, Nmap (NSE), Wireshark, Kali Linux, Oracle VM VirtualBox, DVWA, PortSwigger Web Security Academy.
- **Networking & Protocols:** TCP/IP Suite, DNS, HTTP/HTTPS, OSI Model, Port Scanning, Packet Capture & Anomaly Analysis.
- **Programming & Scripting:** Python, Java, C++, React, JavaScript, HTML5/CSS3, Bash/Shell Scripting.
- **Documentation & Reporting:** Vulnerability Severity Reporting, Proof-of-Concept (PoC) Documentation, Remediation & Patching Guidance.

PROFESSIONAL EXPERIENCE

DIGIT DEFENCE — CYBERSECURITY INTERN (REMOTE)

Bengaluru, India — Jan 2026 – Jul 2026

Project: Vulnerability Assessment & Application Security Testing **Client:** Digit Defence Client Engagements
Role(s): Security Intern (Doc ID: DF260727438) **Technologies:** Burp Suite, OpenVAS, Nmap, Wireshark, Kali Linux

Responsibilities:

- Conducted vulnerability assessments and web security testing using Burp Suite and OpenVAS targeting standard OWASP Top 10 flaws.
- Evaluated live client environments and engineered Proof of Concept (PoC) demonstrations to validate exploitable security flaws and business logic bypasses.
- Assisted project teams in assessing network attack surfaces and analyzing traffic anomalies using Nmap and Wireshark.
- Formulated technical remediation reports detailing vulnerability severities, reproduction steps, and actionable patch recommendations.

KEY PROJECTS

Project: Net Secure – Real-Time Network Traffic Analyzer & SOC Monitor

Technologies: React, Vite, JavaScript, CSS3, OSI Model, TCP/IP Suite

Responsibilities:

- Architected a modular telemetry dashboard capable of ingesting packet streams, tracking real-time bandwidth metrics, and monitoring protocol distributions.
- Engineered a deep packet inspection (DPI) module simulating Wireshark layer dissection, extracting Ethernet frame data, IPv4 TTL/checksums, TCP/UDP flags, and raw payloads.

- Built heuristic intrusion detection (IDS/IPS) logic to identify port scans, anomalous DNS traffic, and brute-force attempts with dynamic IP drop rules.
- Developed client-side forensic reporting and audit logging workflows with SHA-256 session integrity hashes and one-click JSON/CSV incident archives.

Project: Phishing URL Detection Tool

Technologies: Python, Heuristic Analysis, Regex Pattern Matching, HTTP Inspection

Responsibilities:

- Developed a heuristic detection script to classify deceptive domains by evaluating structural URL entropy and redirection flows.
- Engineered regex pattern extraction to identify obfuscated domain attributes and mitigate typosquatting vectors.
- Implemented automated HTTP response-header inspection to flag endpoints matching known malicious indicators.

Project: Secure Folder Encryptor

Technologies: Java, Cryptography API, AES-256 (CBC), PBKDF2, SHA-256

Responsibilities:

- Built a desktop cryptographic application leveraging AES-256 in CBC mode to safeguard sensitive local files at rest.
- Employed PBKDF2 with dynamic salting for robust key derivation resistant to dictionary and brute-force attacks.
- Integrated SHA-256 hashing to perform strict pre- and post-decryption file integrity checks.

PRACTICAL LABS & HANDS-ON TRAINING

- **Web Application Security Labs (PortSwigger Web Security Academy & DVWA):** Solved structured challenges spanning SQL Injection (SQLi), Cross-Site Scripting (XSS), CSRF, and Broken Access Control. Utilized Burp Suite Repeater and Intruder to craft targeted payloads.
- **Host Reconnaissance & Traffic Analysis Lab (Kali Linux, VirtualBox, Wireshark):** Configured virtualized target environments for vulnerability probing; executed active service enumeration and OS fingerprinting via Nmap NSE; analyzed packet streams in Wireshark for credential leaks and traffic anomalies.

EDUCATION

SECONDARY SCHOOL CERTIFICATE (CLASS X) • CGPA: 10.0 / 10.0
Board of Secondary Education, Telangana — Passed: March 2020

INTERMEDIATE (CLASS XII) – MPC • GRADE A (883 / 1000)
Telangana State Board of Intermediate Education (TSBIE) — Passed: May 2022

BACHELOR OF SCIENCE IN COMPUTER SCIENCE (COURSEWORK COMPLETED; IN PROGRESS)
Keshav Memorial Institute of Commerce & Sciences (Osmania University) — 2022 – Expected 2026

CERTIFICATIONS & TECHNICAL CREDENTIALS

- **Cyber Security Professional (Gold Category)** – NASSCOM IT-ITeS SSC *Jul 2026*
- **Dual Certification: Cyber Security Professional & AI Cyber Security Associate** – IIFIS *2026*
- **Google Cybersecurity Professional Certificate (Foundations of Cybersecurity)** – Google / Coursera *2026*
- **Cyber Security Internship Experience Certificate** – Digit Defence (Doc ID: DF260727438) *Jul 2026*
